### Air Quality Index Map (airnow.gov) – California Environmental Protection Agency (Cal EPA) as of September 30, 2020, at 1200 Hours:

Forecast Discussion: Hot and dry weather with terrain driven winds continue as strong high pressure remains entrenched in the region. With light winds and a strong inversion, smoke will continue to accumulate with worsening air quality. Communities in close proximity to the fire will see *Unhealthy* to *Very Unhealthy* conditions. Communities immediately near the August Complex (Glenn, Lake, Mendocino, Humboldt, Del Norte, and Trinity Counties) in river drainages and deep valleys could see periods of *Hazardous* air. This is likely to occur in the Mad River, Ruth Lake, Van Duzer, and Eel River areas. The Zogg Fire will be a significant smoke producer for communities from Redding to Corning. These conditions will continue through the weekend, with only slight improvement for coastal communities as transport winds shift generally out of the west tomorrow.
